PROFILE

I am a Fullstack Developer with basic to intermediate skills, accustomed to building web applications from the frontend to the backend, from interface design to data and API management. I am also accustomed to working in teams to complete web projects, and am passionate about continuous learning and keeping up with the latest technology developments. With strong analytical, problem solving, and communication skills, I am ready to contribute as part of a productive and collaborative development team.

SKILLS

- Backend: PHP, Laravel, ExpressJS, Blade, Go, TypeScript, Node Js
- Frontend: JavaScript, ReactJS, Svelte, HTML, CSS, TailwindCSS, Bootstrap, Blade
- Database: SQL, MySQL, PostgreSQL
- DevOps: Git, GitHub, GitLab, Docker
- Tools: Postman, VS Code, DBeaver, Jira, Slack, Teams, DBeaver, Katalon, Selenium
- Others: Quality Assurance

WORK EXPERIENCE

Fullstack Developer, PT. Pinus Pintar Teknologi Jan 2025 - Aug 2025

- Developed front-end features using Svelte, creating reactive components, state management, and API integration for real-time data.
- Built fast and responsive UIs using JavaScript, Tailwind, and modern layout structures.
- Optimized application performance by reducing bundle size, implementing code splitting, and applying effective caching strategies.
- Integrated REST APIs from the backend using fetch/axios and built reusable helper functions.
- Conducted efficient debugging using Postman, Katalon and log tracking.
- Collaborated with the team using GitHub, pull requests, and regular code reviews.
- Created technical documentation and ensured consistent coding standards across all projects.

Fullstack Developer, PT. Jago Talenta Indonesia Oct 2025 - Feb 2026

- Developed and maintained backend modules using Laravel, including authentication, middleware, role permissions, queues, and schedulers.
- Built dynamic views using Blade, creating reusable components, layouts, and controller-integrated data flows.
- Designed and optimized MySQL database structures, including complex queries, indexing, and migrations.
- Built, tested, and documented RESTful APIs for front-end and mobile integration needs.
- Performed API testing with Postman and ensured seamless integration with internal systems.
- Collaborated within an Agile team using Jira, and GitLab for code collaboration.

SCHOOL

- Currently studying for a Bachelor's degree in informatics, Universitas Siber Muhamadiyah

PORTFOLIO PROJECTS

Customer-based web application

- TungTung CRM (PT. Pinus Pintar)

Web Management Application

- KickUp (PT. Pinus Pintar)
- Sekool (PT. Pinus Pintar)
- Talmas (PT. Jago Talenta)
